|  |   |  |  |  |  |  |  |

1. This application has been examined. Claims 1-4 are pending in this application.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Krietzman (USPN 6,575,593).

Krietzman discloses the invention substantially as claimed comprising a USB adapter (21) inherently having a proximal end, a distal end, four wires, an USB connector (13) formed on the proximal end and a USB socket (22) formed in the distal end, wherein the two wires of the four wires are power and ground wires and the other two wires of the four wires; and two power wires (two long conductive lead wires), having proximal ends and distal ends, and the proximal ends are electrically

Application/Control Number: 10/616,115

Art Unit: 2833

connected respectively to the two wires that are power and ground wires in the USB

adapter (Col. 2, lines (6-10)); wherein the distal ends of the power wires are connected

to a power connector (21); wherein the power connector is a USB connector; and

wherein the power connector is a standard DC power connector.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Xuong M. Chung-Trans whose telephone number is

(571) 272-2002. The examiner can normally be reached on Monday-Friday from

9:30am to 1:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Paula Bradley, can be reached on (571) 272-2800 extension 33. The fax

phone number for the organization where this application or proceeding is assigned is

703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
